Phil,
There is no "LEED Certification" that furniture manufacturers provide. What they do need to provide is the Green Guard certification certificate or ANSI/BIFMA testing results to show compliance with IEQ Credit 4.5: Low Emitting Materials Systems - Furniture and Seating. They will also need to complete the Material and Resource Calculator which includes Recycled Content, Regional Materials and Rapidly Renewable Materials. I have included the Excel document for your reference that can be included in your RFP. The furniture manufacturer will also need to provide cutsheets and invoices to back up this information.

Let me know if you have any additional questions.

Lynn Goldfarb, AIA, LEED AP BD+C

Subject: Leed & Green Guard deliverables

What is a fair amount of time to allow the furniture contractor to obtain **Leed & Green Guard** certification on their deliverables?
